JAMESTOWN CONTAINER ADDS STOCK LLM/HP LABELER FOR FALCONER, NY OPERATIONS

Schaumburg, IL (May 30, 2017) - Phillip Mack, North American Sales Manager of STOCK Maschinenbau, a German manufacturer, is pleased to announce that Jamestown Container Companies has selected the STOCK LLM/HP labeler with upstacker for its facility in Falconer, New York. Since the firm's founding in 1956, Jamestown Container Companies has grown into a multi-plant, full-packaging supplier with an exceptional reputation for quick turnaround, unmatched service, and quality products. Offering comprehensive packaging solutions, Jamestown Container offers basic and custom shipping boxes; a complete line of wholesale packaging and shipping supplies; foam and protective packaging solutions; colorful point-of-purchase cartons and displays from its in-house packaging design group; and contract packaging / fulfillment services to accommodate the details of the packaging and shipping requirements for its customer's products.

Jamestown Container will add the STOCK LLM/HP Labeler that produces fully-automatic label laminating including both spot or full-sheet labeling. The LLM/HP offers simple operations with rapid set-up that can produce up to 5,000 sheets per hour. Via the unit's upstacker, the LLM/HP stacks the finished product – label side up – for easy and efficient quality control while a stereo or mat is not required for the placement of the adhesive.

Jamestown Container will utilize the labeler to expand into new business markets as well as offer even greater versatility and flexibility of services to its clients. Joseph M. Palmeri, Regional Vice President of Jamestown Container, adds, "To continue to offer our clients the greatest range of flexibility, turnaround time and cost efficiency, the STOCK LLM/HP will provide a seamless solution for spot or full-sheet labeling. This highly-regarded STOCK litho laminating labeler is a proven workhorse that will complement our current production operations while seamlessly integrating into our current plant environment. This German-

engineered, designed and manufactured unit will further our pursuit into new markets and allow us to continue to offer a wide array of comprehensive die cutting and labeling services to our growing and valuable client base.”

Leading STOCK’s North American sales and service office, together with South Korean-based Young Shin USA’s sales and service, Mack added, “We are certain that the addition of the STOCK LLM/HP will deliver the anticipated results that Jamestown Container is pursuing in the growth and expansion of its client offerings. The STOCK line of litho laminators is globally recognized as a premier solution for fully-automatic label laminating.”

To learn more about the expansive product line of STOCK Maschinenbau, please contact National Sales Manager, Phillip Mack, at 847-598-3611, or email at pmack@youngshinusa.com or visit the firm’s comprehensive web site on both STOCK and Young Shin products at www.youngshinusa.com.
