### **Does the stripper work on all types of carton board?**

Yes. It will also handle solid and corrugated fibre board.

### **Will I have to modify my dies?**

This depends on how much stripping rule is already on the die. A waste strip of no more than 45cm is ideal. The smaller the section, the easier it is to remove.

### **Will the stripper handle corrugated and laminated board?**

Yes. Answer above applies. Also on how even a stack comes off the die-cutter. An uneven stack will not provide the support from below to allow the stripper to work efficiently removing the strip above.

### **Will the stripper handle large waste sections?**

Yes. Provided that the cut is good and the notching is not too heavy, large sections pose no problem.

### **What is the minimum waste strip depth the Cartostrip will handle?**

Minimum waste strip depth is as follows: carton board = 8.5mm and corrugated = 20mm

### **Can I use the stripper on work coming off a hand platen?**

This depends on a good even stack. It would be necessary to shutter up against a guide and also the ability to put stripping rule on the job in hand.

### **How long do the chains last?**

This depends on the operator. Provided the stripper is used correctly, a chain should last a minimum of six months, but usually longer.

### **How much time will I save using the stripper?**

A time saving of 85% is achievable against performing the task manually.

## **Specifications**

### **PNEUMATIC**

<b>Power output</b>	<b>750W</b>
<b>Air pressure</b>	<b>6.3 bar (90 psi)</b>
<b>Air consumption</b>	<b>1.98 l/s</b>
<b>Weight</b>	<b>5.2kg</b>
<b>Noise next to machine</b>	<b>91dB</b>
<b>Noise at 1m from machine</b>	<b>86dB</b>
<b>Ambient noise</b>	<b>34dB</b>
