WAUSAU CONTAINER ADDS SECOND YOUNG SHIN REVOTEC DIE CUTTER TO SUPPORT INCREASING BUSINESS VOLUME

Schaumburg, IL (February 6, 2017) - Phillip Mack, National Sales Manager of Young Shin USA Limited, a wholly-owned subsidiary of South Korean-based Young Shin Industries, is pleased to announce that Wausau, Wisconsin-based Wausau Container Corporation has added a second Young Shin Revotec die cutter to accommodate the growing requirements of its clients for high-quality and rapid turnaround production. Wausau Container Corporation specializes in the printing, die cutting, and finishing of custom paperboard packaging. The firm is dedicated to bringing the advantages of the latest in web-fed and sheet-fed press technology to a wide range of folding carton applications.

Young Shin USA provided a 90-day delivery and installation of the Revotec 106SR die cutter to Wausau since Young Shin Industries allocates existing inventory of its comprehensive die cutter product line for its North American clients. The Revotec 106SR is designed and manufactured at Young Shin Industries in South Korea utilizing the most sophisticated electronic components available. Among the many reasons that the Young Shin Revotec 106SR was chosen is that it also offers compatibility with existing dies and provides a seamless integration into the production environment.

Wausau Container has also enjoyed a positive experience with other Revotec die cutter models from Young Shin. In 2015, Wausau Container invested in a Young Shin Revotec 106SB die cutter (stripping and blanking) and values the unit's dependability, precision and low cost of ownership. When a second die cutter was required to meet growing client demands, Wausau Container selected the Revotec 106SR die cutter with stripping. The automatic highly-featured flatbed die cutter offers features and functions far superior to other comparable equipment including:

- A cost-effective, economical purchase price with low annual operational expenses
- An integrated lead edge removal system
- Includes an automatic delivery apron that facilitates non-stop delivery
- UL-certified electronics including UL-wiring
- Greater impression tonnage capacity

Chuck Plier, President of Wausau Container, remarks, "We were very fortunate to enjoy a speedy delivery of this high-quality Young Shin die cutter. Since our associates are currently trained and realizing increased productivity on our existing Young Shin Revotec 106SB, the installation of the Revotec 106SR allowed us to enhance volume while offering even greater turnaround times for our clients."

Young Shin's North American sales and service office is led by Mack, who added, "Wausau Container is an example of today's proactive business model where capital investments are strategically planned to yield the greatest return. We are pleased that the acquisition of this second Young Shin Revotec die cutter will allow them to continue to achieve their goals of additional business growth and satisfied clients."
